1.2 Changes since last time given

Some lecture material has been improved to reflect recent developments in constraint programming. A whole new lecture has been developed.

1.3 Planned changes

The following changes are planned (the first could not be done this year due to a lack of time):

- An additional assignment as a warm up will be added (it will not be marked but just to make it easier for students to get started).
- Rework part on constraint-based scheduling.

Major changes might happen as I am currently writing a textbook to be published by Springer.
